Newsletter 2011

Autumn - Winter

'2011 heralded an energetic start on our newly funded project site due for planting up in 2012. SNEC volunteers welcomed Carine MLA Tony Krsticevic and also Stirling electorate's, MHR Michael Keenan's support and active help on this preliminary site clean-up. Coastal rehabilitation works are continuing at this site —North Beach to Hamersley Beach and along the other City of Stirling approved project sites.

SNEC Volunteers work in accordance with their Aims and Objects which promote sustainable coastal plant communities and animal habitats, whilst protecting natural biodiversity and landform within the City of Stirling Coastal zone and adjoining areas. To this end they speak on behalf of the Natural Areas...

Healthy natural areas along the metropolitan coastal plain is a common goal of most coastcare groups. More infrastructure/s for recreation and tourism along our coast could result in a 'chipping away' of the remaining natural assets. City Officers and community representatives have a responsibility to protect these assets and to avoid disturbance while working towards restoration.

Bush Forever site 308, Trigg Bushland is under threat. Coastal foreshore is involved. See maps. Dept Environment on website triggbushland.org.au

Panning for Gold?

No— they are sieving out highly invasive Black Flag from 'North Beach to Hamersley Beach' project site

Edith Cowan University's latest intake demonstrating their support for volunteer work along our coast by actively volunteering themselves to support that work .

Reviewing the volunteer activity

4000 plants for this Winter's planting due to a Caring for Our Country Grant, funded through the Australian Government Land and Coasts scheme. Preparatory hand weeding management by SNEC continues, assisted where appropriate by chemical weed management. Work is supported by City of Stirling, Natural Areas team and through North Metropolitan Coastcare Coordinator, Kate Spatore, Perth NRM.
